

Remote Solutions Universal Print Driver Client Installation - Mac

In order to use the best solution for printing in Remote Solutions please follow the steps to download and install a small application. This process will install a Universal Printer client from UniPrint. Once installed, please take some time to read the document Working with the UniPrint Universal Client in Remote Solutions pdf.

Download Client Application

To download the application please open a web browser and go to <http://www.churchmanagementsolutions.com/support>. On the left side you should see a Menu called Remote Solutions Universal Print Client. Click on the appropriate download for your operating system. Use this file to install Uniprint on your local PC/Mac. Install directions are also included in this location.

Copy the file to a location on your computer or network.

Minimum System Requirements

UniPrint Client 4.0 requires the following:

- Mac OS X 10.4 or later.
- Microsoft Remote Desktop Connection Client for Mac

Installing UniPrint Client

A user must log in with administrative rights to perform the following steps.

1. Log on to the client workstation with administrative rights.
2. Open the virtual image file called **UniPrint Client for Mac 4.0.dmg**.
3. Select **Agree** to accept the license agreement terms and conditions.
4. The virtual disk, **UniPrint Client 4.0 Installer**, should appear on your desktop.
5. In the **UniPrint Client 4.0 Installer** dialog box, drag the **UniPrint Client** folder to your **Applications** folder.
6. Once **UniPrint Client 4.0** appears in the **Applications** folder, eject the **UniPrint Client 4.0 Installer** virtual disk to unmount the disk.
7. In the **Applications** folder, open the **UniPrint Client 4.0** folder.
8. Double-click the **UniPrint Client** application icon to launch the client.
